Top 25 Healthcare Technology Solution Providers - 2017

The increasing convergence of technology and healthcare continues to marvel both healthcare providers and technology enthusiasts alike. The prime drivers of innovation in this space include rising access to care, providing patients with more personalized diagnostics, and ultimately, increasing societal health standards. The most novel of innovations in healthcare technology have emerged in the shape of robotic surgery, laser technologies, ingestible sensors, and smart pills. Alongside, mobile applications and 'wearable' technologies have also made strides in the healthcare industry, providing physicians access to an expanded granularity of patient-data to be exploited in determining appropriate treatment schemes.

As technology is revolutionizing the healthcare industry in its own unique rhythms, patient-care is being propelled ahead in a way that could deliver great dividends to healthcare providers and technology innovators. According to a recent Los Angeles Times report, "Although the United States spends comparatively more than any other country on healthcare, the outcomes in improvement lag far behind to essentially meet the health needs of its population." This frightfully astonishing fact points towards an era that has much room for betterment when it comes to healthcare. Attributing to this major growth-prone market, healthcare technology providers are rapidly evolving to balance heightened regulatory requirements, soaring healthcare costs, as well as operational efficiency.

Having thoroughly examined multiple horizontal of the contemporary Healthcare Technology industry, a distinguished panel of editors at CIO Applications, brings to you "Top 25 Healthcare Technology Solution Providers - 2017". The list accentuates innovative players in the Healthcare Solution arena who have proven their efficiencies in contributing uniquely and significantly to this critical sector of life-saving services and solutions. The following solution providers have been filtered down based on their abilities to elevate operational efficiency, reduce cost and upgrade patient experience.

CareClix

Comprehensive Web-Based Application for Telemedicine

The healthcare sector has seen many developments in the recent times and most especially on the technology side. With the advent of the cloud technology, more companies are leveraging its benefits and creating smarter solutions for the healthcare sector. However, not many companies have executed the cloud technology with as much prowess as CareClix. The Washington DC based firm has used the cloud technology to literally create virtual medical clinics and hospitals that replicate traditional medical clinics holding doctor-patient appointments. This opens up a whole new dimension in the healthcare sector, allowing doctors and patients to collaborate in an online environment.

CareClix Anywhere is the company's web-based software application that allows for an immersive online collaboration for patients and doctors. Possessing high accessibility, CareClix Anywhere can be used from laptops, tablets, and mobile phones from anywhere in the world. Additionally, CareClix Anywhere holds interfaces with a multiple EMRs, healthcare infrastructures, and hardware components.

The way we have structured everything with our technology provides a simple and easy entry point into telehealth

Mimicking the doctor-patient relationship is what CareClix's stellar solutions excel in and CareClix Exam is one of them. CareClix Exam is a telehealth cart that can be positioned in various environments like hospitals, pharmacies, clinics, schools, and so on. Having all the pre-requisite tools for a medical examination like stethoscopes, cameras, and blood pressure monitors, CareClix Exam allows doctors to carry out high-level examinations of patients remotely from anywhere in the world. The company offers another solution called CareClix Home which is a next generation patient-centric medical home. Consisting of many diagnostic tools and equipments, it allows patients to conduct simple examinations and tests from home and has the uncanny ability to alert the doctors and medical staff if any discrepancies are found in the test results.

For any company to succeed, it needs to provide its solutions and services in a simplistic manner to the clients and that is precisely what CareClix does. "The way we have structured

everything with our technology provides a simple and easy entry point into telehealth," says S. John Korangy, the CEO of CareClix. The firm's solutions also have the uncanny capability to expand and become more robust when the users choose to grow internally and add more components and features. This transition from simple programs to more complex and multifarious ones showcases the versatility of CareClix's solutions.

CareClix has helped numerous clients overcome various hurdles across different spectrums. The company successfully helped a multi-speciality group overcome certain challenges surrounding their onboarding process that included training their doctors and helping them develop most of the internal workflow items. CareClix assisted their staff in load balancing and developed many of the internal workflow tools that they required in a very streamlined fashion. Additionally, the firm also created a virtual care program that gave the medical group round-the-clock visibility of their patients by using CareClix's mobile applications.

With the ability to mimic the doctor-patient relationship to perfection and provide virtual clinics and medical offices that are indistinguishable from the real brick and mortar offices, CareClix steers well ahead of its competition. CareClix's simplistic approach and user-friendly demeanor also reflect in its prowess. Partnering with top firms like Johns Hopkins Health System, CareClix plans on expanding intrinsically in the telehealth medical groups and networks. Having operations in different parts of the Middle-east, Asia, and North Africa, CareClix looks to expand globally as well. Currently holding a number one ranking, provided by Healthline amongst telemedicine companies, CareClix is poised firmly in the Healthcare technology sector. **CA**
